ACKNOWLEDGEMENT

- ▶ We express our deep sense of gratitude to our RESPECTED HOD-> DR. ANU CHAUDHARY **college name** for the valuable guidance and for permitting us to carry out this project.
- ► We express our deep sense of gratitude to our guide Mr. SERVACHAN VERMA, Assistant professor, Department of IT, college name->AJAY KUMAR GARG ENGINEERING COLLEGE, for the valuable guidance and suggestions.
- ► I consider myself lucky enough to get such a good project. This project would add as an asset to my academic profile.
- ▶ We express our thanks to all those who contributed for the successful completion of our project work.

With gratitude

- ► Name (Roll no) -> SHIVAM SHARMA 2000270130162
- ► Name(Roll no)-> RANJEET YADAV 2000270130135

This website is a HTML ,CSS and little bit of java script and php based website it is provide the accurate and correct data for the students.

This website is also provide different type of courses that like under graduation ,post graduation, and intermediate also ,and very useful for the students.

- This is the world largest university website that is provided different type of courses at the level of inter UG,PG and different department like Business analytics, Data science, computer science, journalism commerce.
- This is also provide a world class library, best canteens for breakfast and having a largest playground.
- ▶ It is famous all over the world like London, New York, Washington for their best infrastructures and best quality education.

OBJECTIVE

- ► To provide best performance of the university facilities so that student can utilizes the facilities of the university and do their best performance all over the world.
- ► The student who is not able to coming offline in the campus they can get benefit throw this website.
- ► The student who is from outside of nation they would also get benefit and utilizes the facility of provided by university.

Concept Used

HTML HTML is short for Hypertext Markup Language. HTML is used to create electronic documents (called pages) that are displayed on the World Wide Web. Each page contains a series of connections to other pages called hyperlinks. Every web page you see was written using one version of HTML.

HTML code ensures the proper formatting of text and images for your <u>Internet browser</u>. Without HTML, a browser would not know how to display text as <u>elements</u> or load images or other elements. HTML also provides a basic structure of the page, upon which <u>Cascading Style Sheets</u> are overlaid to change its appearance.

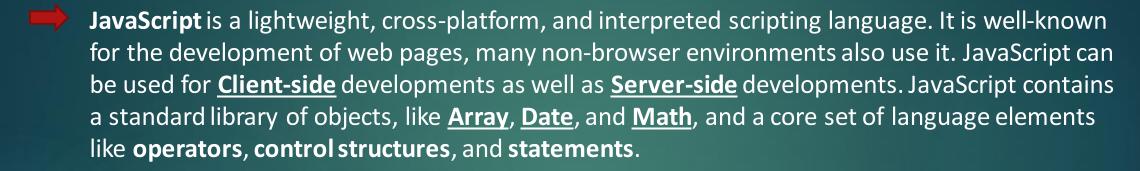

CSS — CSS ,Stands for "Cascading Style Sheet." Cascading style sheets are used to format the layout of <u>Web pages</u>. They can be used to define text styles, table sizes, and other aspects of Web pages that previously could only be defined in a page's HTML.

CSS helps Web developers create a uniform look across several pages of a Web site. Instead of defining the style of each table and each block of text within a page's HTML, commonly used styles need to be defined only once in a CSS document. Once the style is defined in cascading style sheet, it can be used by any page that references the CSS file.

Concept used

Internal JS: We can add JavaScript directly to our HTML file by writing the code inside the <script> tag. The <script> tag can either be placed inside the <head> or the <body> tag according to the requirement.

External JS: We can write JavaScript code in other file having an extension js and then link this file inside the <head> tag of the HTML file in which we want to add this code.

PHP

- ▶ PHP is a recursive acronym for "PHP: Hypertext Preprocessor". PHP is a server side scripting language that is embedded in HTML. It is used to manage dynamic content, databases, session tracking, even build entire ecommerce sites.
- It is integrated with a number of popular databases, including MySQL, PostgreSQL, Oracle, Sybase, Informix, and Microsoft SQL Server.
- PHP is pleasingly zippy in its execution, especially when compiled as an Apache module on the Unix side. The MySQL server, once started, executes even very complex queries with huge result sets in record-setting time.
